

## How to Setup & Run this Project

### How to Run Project ( **Video Tutorial** ) - [Click Here](#)

#### Links

#### ❖ Install Latest NodeJs ( Ignore If Already Installed )

1. Visit the official Node.js website <https://nodejs.org/en/download/>
2. Download the Node.js installer
3. Run the installer.

#### — First Run Server then Client —

#### ❖ Steps to setup **Server** of the project

1. Open Project Folder In VS Code
2. Setup The Neon Database & obtain **Database URL**

Link : <https://get.neon.com>

now run the commands inside server folder to sync neon database and prisma schema

```
npm install
```

```
npx prisma migrate dev --name init
```

```
npx prisma generate
```

3. Setup **OpenRouter Key**

Link : <https://openrouter.ai>

4. Add Stripe Secret Key & Webhooks Secret ( optional for payment )

Link : <https://stripe.com>

Note : to generate webhook secret use dummy link ( we will update it later )

Upload Project on **Github** and Deploy server on **Vercel**

Update Live Link in Stripe Webhook Endpoint

5. To run server locally open server folder in Integrated terminal
6. Now run **server** using command

```
npm run server
```

>>> Before Running **Client** Projects make sure **Server** is Running

❖ Steps To Run **Client** of The Project

1. Add **server live link** in **.env** file ( skip if running server locally )
2. Open **client** Folder in Integrated Terminal
3. Install Dependencies Using Command

```
npm install
```

4. Now Run Project Using Command

```
npm run dev
```
